

DECORATING TIPS

One of the biggest challenges when decorating is choosing fabrics and furniture from the huge selection out there. The best way to make decisions is to start with a mood board. First collect images of rooms that appeal to you to act as inspiration. Then start collecting fabrics, wallpapers and paint samples to establish the look and feel you're after. Snap photographs of furniture you like or download them from websites. Put these together on a mood board and you'll soon see if your choices are working. Here are three of the latest looks.

ZEST FOR LIFE

Combine vibrant pinks with leafy greens for a look that epitomises summer living
