

THIS MONTH WE'RE LOVING... SUNNY-PRINT TABLE RUNNERS

Local designer Heather Moore of Skinny laMinx has done it once again... she's delivered another bold, bright design that instantly put a smile on my face when I saw it. The aptly named Sunshine Table Runner in the utterly gorgeous Persimmon shade (pictured here) epitomises happiness, doesn't it? It's just so inviting! The great thing about a runner is that it will fit any table size, and when sitting down to your meal, you can also include the matching napkins from the brand. This set-table scene is one you can recreate easily without needing an 'eye for design', thanks to these buys.

DO TROPICS DIY-STYLE

KNUS FABRIC

Paging through the issue, you may have noticed our fun tropical colour-clash of pinks and greens in the 'We love...' round-up (see p4). Now, if you'd like to get a little more hands-on in tapping into this decor feel, you could always take up a DIY project of reupholstering a chair, or making your own scatter. Knus has the perfect 100% cotton home-decor fabric for the job. Called 'Safari Foliage One', it's a feminine, whimsical take on the tropics print - crucially, with different tones of pink and greens, plus a little beige to ground the scheme. The brand stocks over 40 fabrics, all from **R660/m**; see knus.co
